

# Did You Know?

Tsuut'ina Health and  
Wellness Services  
Community Health Team

The Tdap Vaccine Is Recommended  
During Pregnancy and for Anyone Who  
Will Be Around the Baby

## Why?

The Tdap Vaccine Prevents Your Infant from  
Getting Whooping Cough Until They Can Get  
Vaccinated at 2 Months of Age

## When Can You Get Vaccinated?

Tdap Vaccination Is Recommended Between  
27 and 32 Weeks of Every Pregnancy and  
Every 10 Years for All Other Adults

To book an appointment to get vaccinated  
please call the Health Centre at  
403 251-7575
