Eye Exams

For people with diabetes.

DID YOU KNOW that diabetes increases your risk of
— — — — — **developing eye disease?**

Diabetes is a leading cause of blindness in working age adults. Uncontrolled blood sugar damages the retina (the nerve at the back of your eye), which can often present without symptoms in the early stages.

The sooner you catch developing complications, the more likely they can be treated. Screening services are available at the Health Centre Monday-Friday, 9:00AM-4:00PM.

If you or a family member have been diagnosed with diabetes or pre-diabetes, please call to book an appointment at (403) 251-7575, ext. 150.
